Software Development Methods, Discrete Mathematics, Intro to Data Science with R, Linear Algebra, Program and Data Representation, Probability, Theory of Computation

SKILLS

Python, Java, C++, R, HTML, CSS, Javascript, Microsoft Office

PROJECTS

<https://darwinkhay.github.io/projects.html>

League of Legends Win Predictor

- An application that calculates the percentage chance to win a game of League of Legends with data 10 minutes into the game. This application was made by using the Electron framework and HTML/CSS/Javascript. The model was created using logistic regression in R.
- https://darwinkhay.github.io/leagueoflegends_winpredictionusingR.pdf

Maze Game

- A simple maze game where the user has to collect coins to advance to the next level among other obstacles. This game was coded using Python (specifically using the PyCharm IDE) and the pygame and gamebox libraries.
